**Patient Name:****DOB:****Date:*****INFORMED CONSENT TO CARE***

A patient coming to the Acupuncturist or doctor gives him/her permission and authority to care for them in accordance with appropriate test, diagnosis, and analysis. The clinical procedures performed are usually beneficial and seldom cause any problem. In rare case, underlying physical defects, deformities or pathologies may render the patient susceptible for injury. The Acupuncturist or doctor, of course, will not provide specific healthcare, if he/she is aware that such care may be contraindicated. It is the responsibility of the patient to make it known or to learn through health care procedures from whatever he/she is suffering from: latent pathological defects, illnesses, or deformities, which would otherwise not come to the attention of the physician. This office does not perform breast, pelvic, prostate, rectal, or full skin evaluations. These examinations should be performed by your family physician, GYN, and dermatologist to exclude cancers, abnormal skin lesions that should undergo biopsy/removal or other treatments. We also do not prescribe or refill ANY controlled substances. All prescriptions should be refilled by your original prescriber and any new prescriptions should be issued by your primary care provider.

The patient assumes all responsibility/liability if the patient does not report on health forms any past medical history, illnesses, medicines, or allergies.

I agree to settle any claim or dispute I may against or with any of these persons or entities, whether related to the prescribed care or otherwise, will be resolved by binding arbitration under the current malpractice terms which can be obtained by written request.

I understand that methods of treatment may include, but are not limited to, acupuncture, moxibustion, cupping, electrical stimulation, Tui-Na (Chinese massage), Chinese herbal medicine, nutritional counselling, and physical medicine services. I understand that the herbs may need to be prepared and the teas consumed according to the instructions provided orally and in writing. The herbs may be an unpleasant smell or taste. I will immediately notify a member of the clinical staff of any unanticipated or unpleasant effects associated with the consumption of the herbs.

I have been informed that acupuncture is a generally safe method of treatment, but that it may have some side effects, including bruising, numbness or tingling near the needling sites that may last a few days, and dizziness or fainting. Burns and/or scarring are a potential risk of moxibustion and cupping, or when treatment involves the use of heat lamps. Bruising is a common side effect of cupping. Unusual risks of acupuncture include spontaneous miscarriage, nerve damage and organ puncture, including lung puncture (pneumothorax). Infection is another possible risk, although the clinic uses sterile disposable needles and maintains a clean and safe environment.

I understand that while this document describes the major risks of treatment, other side effects and risks may occur. The herbs and nutritional supplements (which are from plant, animal and mineral sources) that have been recommended are traditionally considered safe in the practice of Chinese Medicine, although some may be toxic in large doses. I understand that some herbs may be inappropriate during pregnancy. Some possible side effects of taking herbs are nausea, gas, stomach-ache, vomiting, headache, diarrhoea, rashes, hives, and tingling of the tongue. I will notify a clinical staff member who is caring for me if I am or become pregnant.

With any of the following issues, please consult your physician first before using any vibration machine. If you are recovering from surgery, have serious cardiovascular disease, are pregnant. You have thrombosis, joint implants, a pulmonary embolism, known retinal conditions, severe diabetes, a pacemaker, an implantable cardioverter defibrillators, hip or knee replacement, epilepsy, tumours, acute hernia recently replaced pins or plates, poor somatosensory receptor sensitivity on the plantar surfaces of the feet, or have a severe migraine. Because the VibePlate is much different than other vibration machines, we have had customers use the VibePlate for some of the above issues with no negative feedback. But we still ask you to consult your physician before using the VibePlate.

While I do not expect the clinical staff to be able to anticipate and explain all possible risks and complications of treatment, I wish to rely on the clinical staff to exercise judgment during the course of treatment which the clinical staff thinks at the time, based upon the facts then known, is in my best interest. I understand that results are not guaranteed.

I hereby authorize Malik Khan dba Achieve Health to release any information regarding my condition to the referring physician (if any) and/or to my insurance for the processing of any claim.

Prior to receiving care a health history and physical examination will be completed. These procedures will assist the practitioner in determining which modalities are needed, or if any further examinations or studies are required. I intend this consent form to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment.

I have read and understand the above consent form.
